SG Design Making its Mark

Singapore Good Design Mark 2017 recognises remarkable projects in the design arena.

Design is all around us. The best design is often the kind we take for granted. It integrates seamlessly into our lives to make it more convenient, beautiful, safe, and sustainable. This year, the Singapore Good Design Mark recognises 36 places, spaces, products, services and tools that embody the spirit of good design: design that is not only beautiful, but improves lives and businesses.

SG MARK PLATINUM WINNER

OASIA HOTEL DOWNTOWN
Designer: WOHA
Client: Far East Organization

The project is a high-rise integrated hotel-office development covered by a façade lined with lush greenery, with an overall greenery replacement of over 10 times the site area. The façade opens up on different floors to elevated gardens cut three-dimensionally into the building like huge windows, creating a distinctively more sustainable, humane and liveable development.

SG MARK GOLD WINNERS

AIRMOTION MASK
Designer: Leonard Tan Bahroocha
Client: Airmotion Laboratories

AIRMOTION LABORATORIES' highly protective PM2.5 filter mask allows participation in outdoor activities even in poor air conditions. Its innovative AIR-IQ Multi-Function Smart Module takes in clean air to make breathing easier and its replaceable PM2.5 filters allow for affordable continuous usage. The mask's design makes it easy and comfortable to wear and secure.

ONEWEALTH MOBILE APP
Designer: Jin Kang
Client: Experience Design department, OCBC Bank

To help clients achieve and manage their investment goals in a simple and personalised way while on the move, the OCBC OneWealth mobile app builds on three core principles: accessibility, simplicity and personalisation. Customers are served useful and easy-to-understand content, as well as customised alerts and targeted information, to make investing simpler.

THE PEACH GARDEN
Designer: KLID (Kris Lin International Design)
Client: Zendai Group

Drawing inspiration from the ancient Chinese tale, 'The Peach Blossom Spring', this Shanghai residence combines a unique natural landscape with oriental elements of peach blossoms, pebbles and grid details. Making space permeability a priority, the architectural design of the building effectively uses natural light and air to merge nature with the residents' senses.

SG MARK SPECIAL MENTION WINNERS

THE BIG PICTURE
Designer: Suntec Singapore
Client: Suntec Singapore Convention & Exhibition Centre

At 15 metres tall and 60 metres wide, The Big Picture is certified by the Guinness World Records as the 'Largest High Definition Video Wall' in the world. Its unique 'wing' profile blends seamlessly with the adjacent escalators. It is stable, sustainable, easy to maintain, conveniently controlled and delights visitors.

WATERWAY TERRACES I & II
Designer: Aedas and group8asia
Client: Housing & Development Board

Inspired by Southeast Asia's terracing rice paddy fields, this public housing development employs the visual language of stepped terraces. The new hexagonal and terracing typology of housing forms capitalise on views of the waterway and enhance connectivity. The multiple façade orientations and internal voids and openings promote natural ventilation, light penetration and passive shading features.

INNOGPS
Designer: Asst Prof Jianxi Luo, Bowen Yan, Jeffrey Alstott, Giorgio Trulzi, Ke Shu
Client: Singapore University of Technology and Design

InnoGPS is a data-driven interactive visualisation technology to empower innovators, companies and governments in search of emerging technologies, innovation opportunities and pathways. Inspired by traditional GPS used in geographical navigation, it integrates an empirical map of all known technologies and various data-driven visualisation functions for positioning and path-finding in the technology space map.

JAPANESE AVALANCHE KILLS 8 STUDENTS

More than 100 soldiers have been deployed in a major rescue effort after an avalanche hit a springtime climbing lesson on a ski slope in Nasu, eastern Japan, yesterday. Eight students and a teacher from a high school mountaineering club died, while 40 others were injured.

TRIAL TO BEGIN AROUND 11PM

New signalling system to be tested on NSL trains today

KENNETH CHENG
kennethcjw@mediacorp.com.sg

SINGAPORE— Tonight, the North-South Line (NSL) will switch over temporarily to a new signalling system as part of continuing trials, with all trains on the 26-station line halting for around 10 minutes during the final hour of service from about 11pm.

The downtime will allow rail operator SMRT's operations control centre and train captains to switch the network and trains to the new system, which will then be in use until the end of train services.

The trial will involve more than 30 trains, about half the number that run on the NSL during peak hours. During the last hour of service, passenger numbers are about one-fifth of that during peak hours —
